

HOW TO USE YOUR BESTON

- 1** Connect the charged battery to the pocket cable.
- 2** Press and hold one of the two buttons for 2 seconds, the light will blink until it reaches the maximum temperature.
- 3** When it stops blinking, with a single click you can adjust the temperature level and heat zones.

Set the temperature to low, medium or high

Choose the area: front, back or both sides

Battery instructions

We provide you with a USB to Micro USB cable to charge your battery.

Press the left button on the battery to see the charge level. If the battery light flashes, it means it is still charging.

The battery has 2 USB inputs designed to charge your jacket and also your devices (smartphone, wireless headphones) even while you warm up.

The battery life will depend on the temperature level and heat zones used, and can last up to 6.5 hours.

Cuidados

The heating system is CE approved (it has an auto shut-off system in case of water infiltration).

We recommend hand washing the products, although they can be machine washed if necessary, at 30 degrees. Remember to remove the battery and close the pockets.
